Netgear XAVB2101 Powerline AV 200 Nano Adapter Kit Review
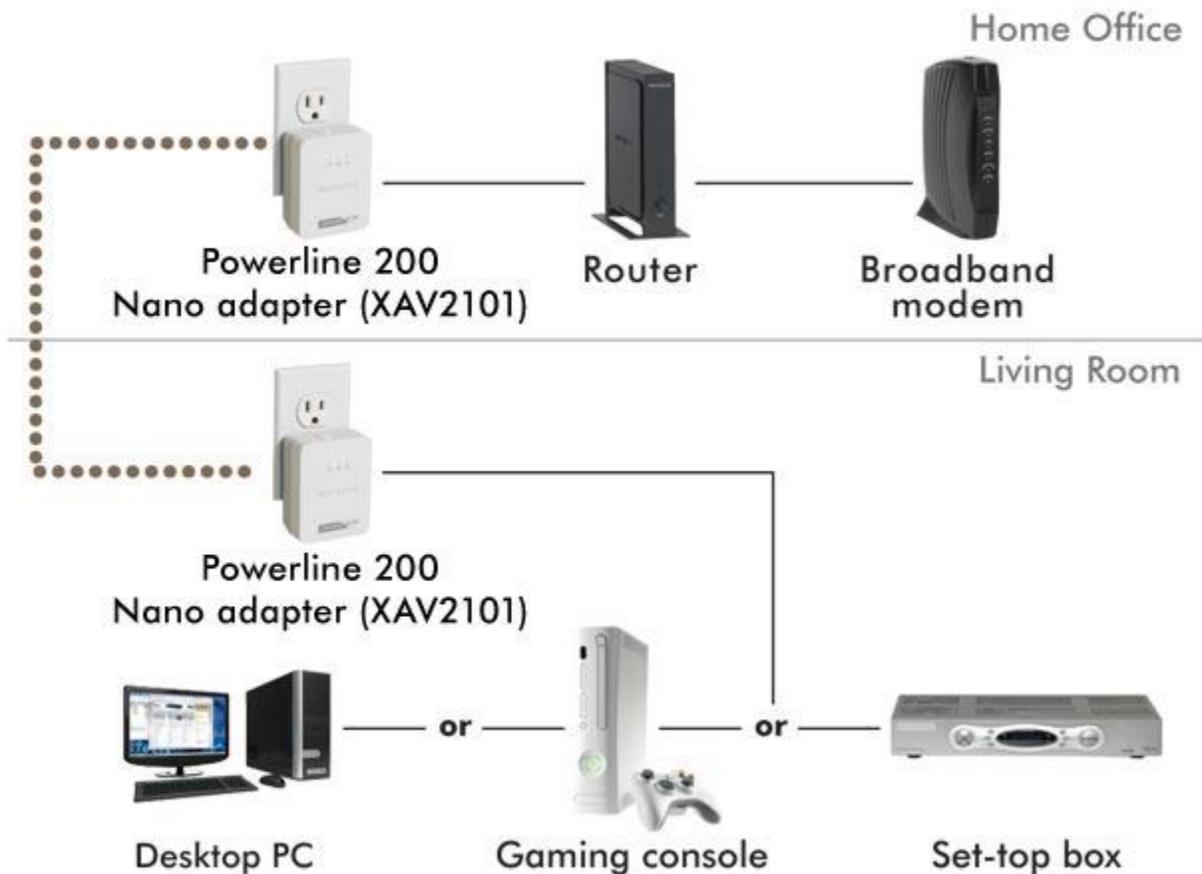

One of the questions we receive most often at ISP 1 is: How do I extend my home network to areas with poor wireless reception? There are multiple ways to do this including running Ethernet cable, wireless extenders, etc. One of the easiest methods is to use Ethernet powerline adapters. The Netgear XAVB2101 Powerline AV 200 Nano Adapter Kit is a convenient and very easy solution.

The XAVB2101 powerline adapter kit extends your broadband Internet connection to any common power receptacle. The kit includes two power modules and can be expanded to meet your needs. The way it works is you simply plug one module into a power outlet by your router and another into a power outlet in the room that you would like to extend your broadband network to. There is a standard RJ45 Ethernet jack on each module. You connect a Ethernet patch cable between the power module and the router and another between the other module and your device, it's that simple. The devices use HomePlug Powerline Networking standard and can function with other HomePlug devices from various manufacturers.

They work great for streaming HD video such as NetFlix to ROKU boxes smart HDTVs, Blu-ray players, etc. They can also solve poor connection problems with PCs and game consoles, Xbox, Playstation, etc. in areas of your home with weak WiFi signal or heavy wireless interference.

Powerline Ethernet Adapters are easy to setup, just plug and play. The Netgear XAVB2101 Powerline AV 200 Nano Adapter Kit is one of the highest consumer reviewed Powerline Adapters you can buy at Amazon.

Amazon Customer Reviews:

★★★★★ Easiest network setup ever, November 8, 2012

This review is from: **Netgear XAVB2101 Powerline AV 200 Nano Adapter Kit(XAVB2101) (Personal Computers)**

"I just plugged one end near my router and connected the cable. At the other end, I did the same and I was up and running. I was getting over 20 Mbytes/sec throughput. When I was on wireless, I was getting less than 5Mbytes/sec at the same distance. I also got a second set of adapters and all 4 connect easily. No ugly wires and great speeds. What more could you ask for."

★★★★★ Works surprisingly well, June 18, 2012

This review is from: **Netgear XAVB2101 Powerline AV 200 Nano Adapter Kit(XAVB2101) (Personal Computers)**

"Well, this works surprisingly well. I mainly use this now for my Roku 2 XD Streaming Player 1080p . The main reason why I use it is because my Roku is kind of far away from my wireless router. Sometimes there maybe interference and the Roku have to adjust to a lower quality or stop playing all together.

Thanks to this adapter, I have not had a connection problem. I just connected the adapter to my router and connected the adapter to the Roku. Now I can stream movies and shows with ease. It also worked well with my laptop too. So the is an amazing device for me "

★★★★★ Flawless!, May 25, 2012

This review is from: **Netgear XAVB2101 Powerline AV 200 Nano Adapter Kit(XAVB2101) (Personal Computers)**

"I absolutely love this product! We have three computers in different rooms as well as gaming systems. This product does exactly what it says it will. With very simple plug and play installation, you can have high-speed internet from any wall outlet. This works great for all my PCs and gaming consoles. Perfect for the Wii. Flawless operation. This is what I've been looking for and I'm very pleased to find it. Highly recommended!"

Conclusion:

The Netgear XAVB2101 Powerline AV 200 Nano Adapter Kit will not speed up a slow Internet connection. If your broadband ISP service is too slow to stream smooth Netflix video then powerline adapters will not help. You'll need to **find a faster Internet provider**. However if you have a fast Internet provider but your problem is extending your broadband connection to a area with poor or unreliable wireless signal, then a set of powerline adapters may provide a simple solution. The speed, performance, features, and **Excellent Customer Reviews** of the Netgear XAVB2101 make it a good choice if you're in the market for a quality powerline adapter kit. In my opinion and that of many customers that submitted reviews the Netgear XAVB2101 is a quality product and deserves five stars. ★★★★★
